Labor Category Definitions

MANAGER

Principal Duties and Responsibilities:

- Responsible for the effective management of funds and personnel and is accountable for the quality and timely delivery of all contractual items.
- Operates within client guidance, contractual limitations, and company business and policy directives. Serves as focal point of contact with client regarding program activities.
- Ensures that all required resources, including manpower, production standards, computer time and facilities are available for program implementation.
- Manages program consisting of multiple projects, including project identification, design, development and delivery.
- Maintains the development and execution of business opportunities based on broad, general guidance. Responsible for marketing new technology and follow-on business acquisitions.
- Confers with project manager to provide technical advice and to assist with problem resolution.
- May perform other duties as assigned.

PROJECT MANAGER

Spend the greatest proportion of their time in “managerial work” for which a background consistent with that described for engineers and scientists is required. They often do not have formal line authority (e.g., performance appraisal responsibility) over individuals working under their direction. Generally direct and manage large-scale, resource-intensive activities that often cut across formal organizational boundaries and are oriented toward specific technical or DOE programmatic activities. Include individuals who also have general managerial responsibilities if more than 80% of their time is spent performing project and/or program management functions. Exclude scientists and engineers who lead a task or small to moderate projects in their specialty area and engage in a considerable degree of technical work.

Principal Duties and Responsibilities:

- Coordinates the resolution of production-related problems.
- Ensures that proper relationships are established between customers, teaming partners and vendors to facilitate the delivery of information technology services.
- Provides users with computer output. Supervises staff operations.

ENGINEER / SCIENTIST / ANALYST

Principal Duties and Responsibilities:

- Plans and performs engineering/scientific research, design development and other assignments in conformance with design, engineering and customer specifications.
- Supervises team of engineers/scientists through project completion.
- Manages major technical, scientific, and engineering projects of higher complexity and importance than those normally assigned to lower level engineers.
- Coordinates the activities of engineers, scientists, and technicians assigned to specific engineering projects.
- Performs other duties as assigned.

BUSINESS OPERATIONS SPECIALIST

- Develop, negotiate, and administer contracts, subcontracts, and buying agreements. Do not include individuals whose primary responsibilities include providing general administrative and project management support. Include property management professionals and purchasing specialists.
- Communicate with internal and external individuals, groups, or organizations by writing or selecting publicity material, releasing information through various communications channels including the media, preparing and arranging displays, making speeches, and conducting interviews and workshops. Include individuals who develop and support public involvement plans for various activities. Include public involvement specialists, public relations specialists, and freedom of information (FOI) specialists.
- Enforce and advise on health, safety, and other regulations such as those pertaining to people, animals, plant life, products, and establishments. Include environment, safety, and health (ES&H) auditors, professional lab safety inspectors, and regulatory analysts whose primary function is related to records management.
- Develop and examine budget estimates for completeness, accuracy, and conformance with procedures and regulations. Examine requests for budget revisions, recommend approval or denial, and draft correspondence. Provide technical assistance in the preparation of budgets. Duties may also involve coordinating and expediting the flow of work and materials within or between departments of an establishment according to production or other operational schedules.
- Write or edit technical materials, such as equipment manuals, appendices, and operating and maintenance instructions. May oversee the preparation of illustrations, photographs, diagrams, charts and assist in layout work. Develop, write, and edit material for reports, manuals, and related technical and administrative publications.

Special Item Numbers (SINs)

SIN 899-1: ENVIRONMENTAL PLANNING SERVICES & DOCUMENTATION:

Contractors shall provide operational services, advice, or guidance in support of agencies' Environmental Planning Services and Documentation. Examples include, but are not limited to:

- Environmental Impact Statements Under NEPA
- Endangered Species and/or Wetlands Analysis
- Watershed and Other Natural Resource Management Plans
- Archeological and/or Cultural Resource Management Plans
- Environmental Program Management and Environmental Regulation Development
- Economic, Technical and/or Risk Analysis
- Vulnerability Assessments
- Biochemical Protection
- Identification and Mitigation of Threats
- Crime Prevention Through Environmental Design (CPTED) Surveys.

SIN 899-2: ENVIRONMENTAL COMPLIANCE SERVICES:

Contractors shall provide operational services, advice, or guidance in support of agencies' Environmental Compliance Services. Examples include, but are not limited to:

- Environmental Compliance Audits
- Compliance Management and/or Contingency Planning
- Permitting
- Spill Prevention/Control and Countermeasure Plans
- Pollution Prevention Surveys
- ISO 14000, Environmental Management Systems (EMS)
- Community Right-to-Know Act Reporting

SIN 899-4: WASTE MANAGEMENT SERVICES:

Contractors shall provide operational services, advice, or guidance in support of agencies' Waste Management Services. Examples include, but are not limited to:

- Data Collection, Feasibility or Risk Analysis
- RCRA/CERCLA Site Investigation
- Hazard and/or Non Hazard Exposure Assessments
- Waste Characterization and Source Reduction Studies
- Review and Recommendation of Waste Tracking or Handling Systems
- Waste Management Plans and/or Surveys
- Waste Minimization/Pollution Prevention Initiatives
- Review of Technologies and Processes Impacting Waste Management
- Management, Furnishing or Inventory of Material Safety Data via CD, Internet, Facsimile, Mail or Other Media
- Development of Emergency Response Plans

SIN 899-1RC, 899-2RC, 899-4RC:

State and local governments may use GSA schedules for disaster recovery as provided for in Section 833 of the National Defense Authorization Act for Fiscal Year 2007, commonly known as the John Warner National Defense Authorization Act (P.L. 109-364). Specifically, it authorizes the use of Federal Supply Schedules by state and local governments to facilitate recovery from major disasters, terrorism, nuclear, biological, chemical, or radiological attacks. The disaster must be declared by the President under the Robert T. Stafford Disaster Relief and Emergency Assistance Act (42 U.S.C. 5121 et. Seq.).

Global Technologies Incorporated (GTI)

GTI is a high-tech company, with many years of experience providing environmental and technical services that exceed our customer's expectations. GTI specializes in oversight of nuclear fuel reprocessing, hazardous and radioactive waste management and treatment, as well as environmental compliance, permitting, and monitoring. Additionally, GTI provides broad regulatory compliance support for federal laws such as the National Environmental Policy Act (NEPA); the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA); the Resource Conservation and Recovery Act (RCRA); the Code of Federal Regulations; and Department of Energy Directives.

Professional and technical services provided by GTI include the following:

- Engineering research and development in physical, biological, chemical, and industrial technologies;
- Facility safety and quality compliance, systems engineering and management support services, and project planning and performance measurement;
- Environmental restoration, waste management, decontamination and decommissioning, and risk-informed decision making;
- International energy and environmental technology analysis; and
- Environmental technology demonstration, transfer, and commercialization.

Additionally, GTI has provided ES&H support to INL through companies such as Battelle Energy Alliance (BEA) and CH2M-WG Idaho, LLC (CWI). GTI ES&H experiences include *INL ISMS* development and implementation; VPP and VCOP development and implementation; and *ISO 14001* development and implementation.

Other experiences include:

- Risk assessment based on waste characterization and sampling;
- Risk analyses/assessments, surveillance program/compliance verification, emergency management and preparedness activities, as well as comprehensive site evaluations and assessments to identify and quantify wastes present and the hazards associated with potential exposures;
- Preparation, revision, and review of NEPA documentation, including environmental assessments, environmental impact assessments, and categorical exclusions; and
- Technical and programmatic risk evaluations for environmental restoration and waste management activities, including exposure risk assessment, cost/benefit analyses for site remediation alternatives, and development of cost and schedule performance baselines

GTI has the resources and staff to develop solutions for various needs, and the expertise to implement the necessary solutions.
